

“Index.”

Handbook of Emerging Communications Technologies: The Next Decade.

Ed. Saba Zamir

Boca Raton: CRC Press LLC, 2000

Index

10baseT, defined 120

A

AAL. defined 120

AAL1, ATM StatMux trunks 157

AAL5 167

multimedia networking 38

ABR

defined 117, 120

RSVP and ATM 19

AC-3 275

Access control, e-commerce 343

Active networks, adaptability for integrated
services 233

Ad hoc network 53

Adaptation, dynamic 232

Additive white gaussian noise (AWGN) 55

Admission control

IP and integrated services 219

RSVP 4, 16, 17, 25, 33

ADSL

and discrete multi-tone 108

defined 120

AdSpec

RSVP 25

RSVP integrated services 18

RSVP path message 11

Advanced TDMA 251

Advanced television *see* ATV, HDTV

AFC, satellite communications 246

Aggregate route-based IP switching *see* ARIS

Algorithm, defined 117

see also Encoding, Compression

Aloha, contention resolution 114

AM/FM hum modulation 96

Amplifier, defined 117

ANM, defined 120

ANSI, defined 120

APS

failure recovery 210

W-BLSR 207

ARIS

IP/ATM integration 183

Asymmetric video codec 62

Asynchronous transfer mode *see* ATM

ATM

adaptation layer 51, 67

ATM-based cable modem 98, 106

capacity and hybrid network 152

cell, defined 117

cell label 166

compared to other networks 160

defined 117, 120

DOCSIS 97

frame relay interoperation 169

HDTV transmission 316

integrated services 228

IP integration, scalability 167, 169, 179

IP routing (IP Navigator) 180

IP via PVCS 169

multimedia networking 31

multipoint compared to RSVP multicast 19

network capacity 158, 161

RSVP 18

StatMux trunking 148, 155

VPI/VC1 compared to MPLS label 186

vs. MSN 192–194

ATMARP

IP via 171

NHRP-enhanced 176

ATP, IP integration 171

ATV and digital radio 325

Audio

cards, preferred features 281

data characteristics 272

DVD 130

gaps 284–285

Internet characteristics 276

low-cost communication 291

Mbone 270–294

quality via DVD 132

reading on UNIX vs. Windows 281

Audio encoding

aural masking 274

modified discrete cosine transform 275

MPEG 275

perceptual model 275

Audio tool

basic structure 282

compression 284

Internet 280

real-time scheduling 288

silence detection 284–285

Audio transmission

acceptable packet loss 284

described 38

- human auditory system 274
- internet challenges 271
- overview 271
- packet loss 285
- RAT 280
- RealAudio 42, 279
- RTP 279
- silence detection 284
- streaming 42, 279, 280, 292
- Audio-on-demand 280, 292
 - see also* Streaming
- Aural masking, music encoding 274
- Authentication
 - cable modem 110
 - e-commerce 343
 - header, RSVP 16
 - PKI 341
- Automatic frequency control *see* AFC
- Automatic protection switching *see* APS
- Automatic repeat request 55
- Available bit rate *see* ABR
- AWGN 55

B

- Backbone
 - see also* Network
 - caching 307
- Bandwidth 146
 - cable modem allocation 112
 - competition for, wireless networks 54
 - defined 117
 - HFC vs. others 92
 - increasing with WDM 202
 - satellite communications 245
 - Teledesic network 265
 - TV data broadcasting 306
 - wireless video transmission 53
- Bandwidth-on-demand
 - Teledesic network 265
- Beam hopping, SS-TDMA 252
- BER 120
- Best effort service
 - implications for audio 276
 - RSVP 2
- BGP, tag switching 185
- Binary exponential backoff 113, 115
- Binary phase shift keying *see* BPSK
- Bit rate reduction *see* Compression, Encoding
- Bit rate variations, smoothing for video 58
- Blockade state block 13
- Border gateway protocol *see* BGP
- BPSK 253
- Broadband
 - ISDN 218
 - optical networks 189
- Broadcast channels, wireless networks 63
- Broadcasting
 - data 305
 - digital radio 323–334
 - marketplace changes 302,303
 - radio and television 297–308
- Browser user interface, JMAPI architecture 80
- BRR, HDTV 314
- Buffering, audio tool 283
- Burst errors, ARQ in wireless networks 55
- Burst noise 95, 96
- Burst position control, TDMA 251
- Bursty data traffic
 - ATM StatMux trunking 148, 157
 - circuit-switched TDM trunking 146
 - hybrid trunking 152
 - multimedia networking 30
 - packet and ATM networks 149
 - satellite packet communications 254
 - wireless networks, SNR 53

C

- Cable modem 86–121
 - ATM-based 98
 - capacity 92
 - collision resolution 111
 - contention resolution 113
 - contention-based reservations 112
 - error checking 106
 - frequency agility 93, 108
 - headend physical topology, illustrated 99
 - interference from CB and HAM radios 99
 - IP- and ATM-based 106
 - IP-based 98
 - key exchange 110
 - layer architecture 100
 - MAC 91
 - MAC-bandwidth allocation 112
 - noise suppression 96
 - operation, service perspective 115
 - piggybacking 113
 - PMD sublayer 104
 - privacy 98, 110
 - request message 113
 - security 98, 110
 - service aspects 116
 - speed 100
 - standards 97–98
 - TC sublayer 104, 105
 - TDMA 111

- Cable network
 - see also* CATV
 - digital 91
 - HDTV 319
 - history 87–92
 - regulation 88
- Cable spectrum 87
- Cable television, consumer adoption 301
- Call negotiation 279
- C-Aloha, satellite communications 255
- Capacity
 - dynamic 195
 - traffic 148
- Carrier and clock recovery (CCR), TDMA 249
- CATV
 - defined 117, 120
- CBQ 222
- CBR traffic
 - defined 117, 120
 - RSVP and ATM 19
 - TDMA 111
 - video transmission 59
- CC security scheme
 - CC toolbox 373
 - NIAP elements 368
- CD radio 33
- CDMA 253
 - defined 120
 - frequency diversity 54
- CD-ROM vs. DVD 128–129
- Cell management, beams 264
- Cellular systems, generation 50
- CELP 274
- Channel acquisition, cable modem MAC 109
- Channel coding
 - ARQ 55
 - coarse data, UEP 68
 - joint source 64, 68
 - low rate, video transmission 60
 - modulation points 68
 - separation principle 62
 - spatial diversity 55
 - to avoid packet loss 285–287
 - UEP 68
 - vs. source coding, wireless networks 62
 - wireless networks 54
- Channel modeling
 - Markov model 56
 - wireless networks 55
- Channel state estimation 55
- Channel surfing, cable modem 96
- Channels
 - broadcast 63
 - defined 117
 - time-varying 63
- Circuit-switched TDM network
 - capacity 161
 - comparative capacity 159
 - compared to hybrid 153
 - trunks 150
- Circular equatorial orbit 241
- Circular polar orbit 242
- Class marking, DIFFSERV 225
- Class-based queuing *see* CBQ
- Class-based system, DIFFSERV 225
- Cleanup timeout interval, 6
- CLNP, multimedia networking 38
- Closed loop error control
 - video transmission 69
 - wireless networks 54, 55
- Clouds, channel coding 68
- CM, testing methodologies 361, 362
- Coarse agile cable modem 108
- Coaxial, defined 117
- Code division multiple access *see* CDMA
- Code excited linear prediction *see* CELP
- Codec
 - asymmetric video 62
 - identification 279
- Collision avoidance, Iridium 263
- Collision resolution, cable modem 111
- Common criteria
 - security standards 361
- Common methodology for information
 - technology security evaluation *see* CM
- Common-path distortion, cable modem 95
- Compression *see also* encoding
 - voice data 273
- Conference negotiation, standards 279
- Conferencing, Mbone 291
- Configurable WADM 207, 210
- Confirmation messages, RSVP 12
- Congestion
 - audio jitter 283
 - control, RTCP 40
 - control, TCP 278
 - dynamic MPS 195
 - routers 278
- Connection parameters, RSVP 35
- Connectionless network protocol *see* CLNP
- Constant bit rate *see* CBR
- Contention resolution
 - binary exponential backoff 115
 - cable modem 113
 - p-persistence 114
 - tree-based 113
- Control-driven label switching 183, 184
- Controlled load service
 - integrated services 220
 - RSVP 17

- Control information, scaling 41
- Control protocols, transport layer 279
- Control traffic, balancing with information 41
- Copyright
 - DCTP 134
 - DVD 133
 - HDTV 317
- Corba
 - network adaptability 234
- Corona noise, cable modem 95
- CPE, defined 120
- CRC, defined 120
- Crossover links, data broadcasting 305–306
- Cryptographic algorithms, RSVP 16
- Cryptographic keys, 234
- CS-ACELP 273
- CSMA/CD, defined 120
- Cut-through forwarding, RSVP 19
- Cyber television 300
- CyberCash 342

D

- DA/TDMA 257
- DAB, terrestrial 327
- Data broadcasting
 - enhanced 305
 - nonprogram related 306
 - program related 305
 - via television 304
- Data link layer, defined 118
- Data over cable service interface specifications
 - see* DOCSIS
- Datagrams *see* Packets
- DCS 204
- DCTP, DVD 134
- Decryption, cable modem security 110
- Delay
 - adaptive real-time applications 16
 - audio buffering 283
 - audio transmission 277
 - caused by routers 276
 - constraint, video transmission 58, 70
 - defined 118
 - dynamic MPS 195
 - variation, RSVP QoS 17
- Demultiplexing 204
- Designated SBM 20
- Differentiated services *see* DIFFSERV
- Diffie-Hellman exchange 110
 - see also* key exchange
- DIFFSERV 222, 224
 - compared to INTSERV 226
- Digital audio broadcasting *see* DAB

- Digital cash 342
- Digital certificates PKI 340
- Digital compression, defined 118
- Digital crossconnect system *see* DCS
- Digital frequencies, cable modem 91
- Digital radio 303, 323–334
 - advertising revenue 332
 - CEMA and consumer adoption 325
 - FCC policies 325
 - multiplexing 327
 - satellite DARS 330
- Digital signatures, PKI 340
- Digital switching, FDMA 245
- Digital television, *see* DTV, HDTV
- Digital TV, ATSC 315
- Digital VCR 127
- Discrete multi-tone
 - see also* DMT
 - cable modem 108
- Divx, DVD 136
- DMT, cable modem 108
- DOCSIS 105
 - ATM 97
- Doppler shift, wireless networks 54
- Downstream, defined 118
- Downstream transmission, cable modem 100
- Drops, CATV 90
- DS byte 226
- DS codepoints, establishing 227
- DTV, compared to HDTV 310
- DVD 123–140
 - adoption of 136
 - audio 130
 - consumer awareness 135
 - copyright issues 133, 134
 - costs 133
 - formats 130
 - future adoption 131
 - home video adoption 126
 - key advantages 132
 - liabilities of 132
 - obstacles to adoption of 133
 - RAM 137
 - recordable 130
 - rewritable 137
 - ROM 130
 - standards for 137, 139
 - video 130
 - vs. CD-ROM 128
- DVD-RAM 137
- DVD-ROM 130
 - recent developments 134
- Dynamic MPS 195

E

- Echoes
 - Mbone audio tool 290
- E-commerce 301, 337–345, 349–381
 - check transactions 342
 - defined 338
 - digital certificates 341
 - EDI 339
 - encryption 340
 - fostering international trade 366
 - fraud 342–343
 - payment systems 342
 - PKI 340
 - security 340
- EDFA 202
- EDI 339
- Electronic data interchange *see* EDI
- Elliptically inclined orbits 243
- Encapsulating security payload *see* ESP
- Encapsulation
 - for IP 228
 - multiprotocol 167
 - packets in MPLS 186
 - packets, RTP 38
- Encoding
 - multimedia networking 38
 - speech for wireless transmission 80
 - voice data 273
- Encryption
 - cable modem security 110
 - e-commerce 340
 - HDTV 317
 - PKI 340
 - public and private keys 340–342
- End user, defined 118
- Enhanced broadcasting 305
- Entropy coding
 - error propagation 64
 - video encoding 57
- Erbium-doped fiber amplifiers *see* EDFA
- Error checking, cable modem in frame 106
- Error concealment, audio transmission 286
- Error control
 - closed-loop 69
 - video transmission, wireless networks 65
 - wireless networks 54
- Error correction, wireless video transmission
- Error messages
 - RSVP 9, 12
- Error propagation, entropy coding 64
- Error protection
 - unequal, video encoding 67
 - video transmission, wireless networks 63

- Error resilience, reversible variable length codes 65
- ESP, RSVP 16
- Ethernet, RSVP 18
- Ethertypes 168–169
- Eutelsat 241
- Excitation signal, voice encoding 274

F

- Failure protection, WDM
- Failure recovery
 - APS 210
 - W-BLSR 209
- FCC
 - cable regulation 88
 - DAB 327
 - DARS 331
 - digital radio 325
 - Eureka 147
- FCC, HDTV 318
- FDM, cable modem 91
- FDMA 245
 - digital switching 245
 - system throughput 247
- FEC
 - channel coding 287
 - tag switching 184
- Feeder cable, defined 118
- Feeders, CATV 90
- Fiber
 - cable noise 95
 - networks, long distances 209–210
 - node, defined 118
 - optics, defined 118
 - WDM 202
- FilterSpec 6, 25, 34
 - PATH message 10
 - RESV message 11
 - security 16
- Firewire, 314
- Fixed filter
 - reservations 221
 - RSVP 7, 25
- Fixed filter style, RSVP example 8, 9
- Fixed-length code 65
- Fixed-rate traffic, ATM StatMux 157
- Flow-driven protocols, IP Navigator 180
- FlowSpec
 - RSVP 6, 13, 25, 34
 - RSVP, comparing for merging 14
 - RSVP integrated services 18, 220
 - RSVP RESV message 11

- Forwarding
 - cut-through, RSVP 19
 - efficient schemes for IP-NBMA 229
- Frame efficiency, TDMA 251
- Frame relay
 - ATM interoperation 169
 - DLCI VCI compared to MPLS label 186
 - IP Navigator 180
- Frequencies
 - digital 91
 - MSS 260
 - satellite applications 243–244
 - satellite signals 243
 - Spade 246
- Frequency agility
 - cable modem 93, 108
 - cable modem noise suppression 97
- Frequency diversity, wireless networks 54
- Frequency division multiple access *see* FDMA
- Frequency division multiplexing *see* FDM
- Frequency offset 95
- Fundamental layers, cable modem 102

G

- Gap noise 95
- Geostationary orbit 241
 - latency, real-time applications 240
- Geosynchronous satellites, MSS 259
- Globalstar 260
 - defined 118
 - intersatellite links 264
 - network configuration 262–263
- Guaranteed service, integrated services 220
- Guard band, satellite communications 245
- Guard time, TDMA 249

H

- Hacking, security testing 353
- Ham radios, interference to cable modems 99
- HDLC, switched networks 151
- HDTV 127, 309–320
 - benefits 310–311
 - challenges 317–318
 - compared to DTV 310
 - consumer costs 319
 - displays 316
 - drawbacks 311
 - FCC policy 318
 - Firewire 314
 - history 3112
 - interface compatibility 313

- SDTV comparison 310–311
- standards 317
- technology 311
- transmission 313
- HE, defined 120
- Headend
 - CATV 89
 - defined 118
- Header, defined 118
- Header error control, cable modem 107
- HEC, defined 120
- Heterogeneity models, RSVP 19
- HFC network 90–91
 - advantages 91
 - defined 120
 - drawbacks 92
 - MAC 91
 - noise 93
- High level data link control *see* HDLC
- High speed bearer services 228
- High speed mobile data broadcasting 305
- High split, defined 118
- Home computing *see* PCs
- Home passed, defined 118
- Home video *see* Video
- Hop address
 - RSVP message 11
 - RSVP path message 10
- Hop count, time-to-live 24
- HOST 377
- HTTP, compared to RTSP 43
- Hum modulation, cable modem 94
- Human auditory system 274
- Hunt state 107
- Hurst parameter
 - ATM network capacity 158
 - determining network capacity 154
- Hybrid fiber coax *see* HFC
- Hybrid networks 161
 - compared to others 160
 - optical and electronic 190

I

- IBAC DAB 327
- IBOC DAB 327
 - broadcast radio 303
- ICO, mobile satellites 260
- IEEE, defined 120
- IEEE 802 networks
 - cable modem 108
 - RSVP 20
- IEEE 1394 *see* Firewire

- IETF integrated services working group 219
 - security testing 377
- IFMP, IP switching 179
- IGMP
 - Mbone 280
 - RSVP 3, 35
- Image encoding
 - compression algorithms 61
 - for power efficiency 61
- Impulsive noise 95
- In-band/on-channel *see* IBOC
- Inelastic applications *see* Real-time
- Information integrity, PKI 341
- Information technology security evaluation
 - criteria *see* ITSEC
- In-frame error checking 106
- Ingress noise, cable modem 95
- Innovation adoption, s-curve 301
- Integrated services
 - compared to DIFFSERV 226
 - dynamic adaptation 232
 - IEEE 802
 - interaction between components 219
 - IP enhancements 228
 - LAN 222
 - RSVP 16, 220
 - security 234
- Integrated services digital broadcasting (IDSB) 305
- Integrated services network *see also* ISN
- Integrity data objects 12, 16
 - RSVP path message 11
- Intelsat 241, 242
 - SS-TDMA 252
- Interactive video 61
 - HFC 90–91
 - networks 48
- Interference
 - avoiding with WDM 197
 - CDMA 253
- Interlacing 315
- Intermod, cable modem 96
- Intermodulation
 - satellite communications 246
 - TDMA 247
- International trade 366
- Internet
 - compared to other networks 339
 - defined 118
 - encryption 340
 - marketplace value 306
 - security 340
- Internet commerce *see* E-commerce
- Internet group management protocol *see* IGMP
- Internet protocol *see* IP
- Internet telephony 280, 291
- Intersatellite links 264
- INTSERV
 - compared to DIFFSERV 226
 - reservations in DIFFSERV class 227
- IO research 305
- ION 222
- IP address, compared to ATM cell identifiers 166
- IP multicast 3
 - IP Navigator 183
- IP Navigator
 - IP/ATM integration 180
 - IP multicast 183
- IP switching 179
 - problems 180
- IP/ATM integration 228
 - ARIS 183
 - ATMARP 171
 - defined 118, 121
 - IP and ATM
 - integrated model 179
 - high speed bearer services 228
 - integrating with ATM 167
 - IP-based cable 98, 106
 - multicast 279
 - multicast compared to ATM multipoint 19
 - PVCS 169
 - proprietary solutions 179
 - protocol stack for 229
 - overhead requirements for 151
 - performance enhancements 228
 - real-time applications 217
